The risk of loss in market timing or trying to anticipate the best time to buy or sell can be substantial. You should, therefore, carefully consider whether such trading is suitable for you in light of your circumstances and financial resources. Some risks can include:

- Missing out: Investors who try to time the market risk missing out on periods of high returns.
- Timing errors: Investors can make mistakes in timing, which can lead to purchasing too high or selling too low.
- Transaction costs: Investors who try to time the market may face higher capital gains taxes from the government.
